BORDEN

NOVEMBER 2026

Disclaimer

The information contained herein has been prepared to assist interested parties in making their own evaluation of Cronin Exploration Inc. ("Allied" or the "Company") and does not purport to contain all of the information that a prospective investor or partner may desire. In all cases, interested parties should conduct their own investigation and analysis of Cronin. Neither the Company nor any of its affiliates make any representation or warranty as to the accuracy or completeness of the information presented. This includes, without limitation, any estimates or projections, and neither the Company nor its affiliates shall have any liability for any statements (expressed or implied) contained in, or for any omissions from, this presentation or any other written or oral communications transmitted to the recipient hereof in the course of its evaluation of the Company, nor should anything contained herein be relied upon as a promise, representation or warranty regarding future events or performance of the Company. Moreover, the information contained herein speaks as of the date hereof; the Company undertakes no obligation to update any such information. The only statements that will have any legal effect will be those specifically contained or referred to, and then only to the extent provided, in definitive legal documentation.

Forward Looking Statements and Cautionary Notes – This presentation contains "forward-looking information" within the meaning of the Canadian securities laws. Statements, other than statements of historical fact, may constitute forward-looking information and include, without limitation, statements about: anticipated timing and content of upcoming work programs, geological interpretations, receipt of property titles, and potential copper recovery processes; anticipated dates for receipt of permits, approvals and other milestones; anticipated results of drilling programs, feasibility studies and other analyses; anticipated availability and terms of future financing; future production, operating and capital costs; and operating or financial performance. Information concerning potential contingent copper resource estimates also may be deemed to be forward-looking information in that it reflects a prediction of the copper-bearing zones that would be encountered if a copper structure were developed and produced.

With respect to the forward-looking information contained in this presentation, the Company has made numerous assumptions regarding, among other things, the geological, metallurgical, engineering, financial and economic advice that the Company has received is reliable and are based upon practices and methodologies which are consistent with industry standards. While the Company considers these assumptions to be reasonable, these assumptions are inherently subject to significant uncertainties and contingencies.

Additionally, there are known and unknown risk factors which could cause the Company's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information contained herein. Known risk factors include, among others: fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of well results and the geology, continuity and grade of copper deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and estimated economic return; the need for cooperation of government agencies in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty of meeting anticipated program milestones; uncertainty as to timely availability of permits and other governmental approvals; increased costs and restrictions on operations due to compliance with environmental and other requirements; increased costs affecting the metals industry and increased competition in the metals industry for properties, qualified personnel, and management.

All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the results of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.

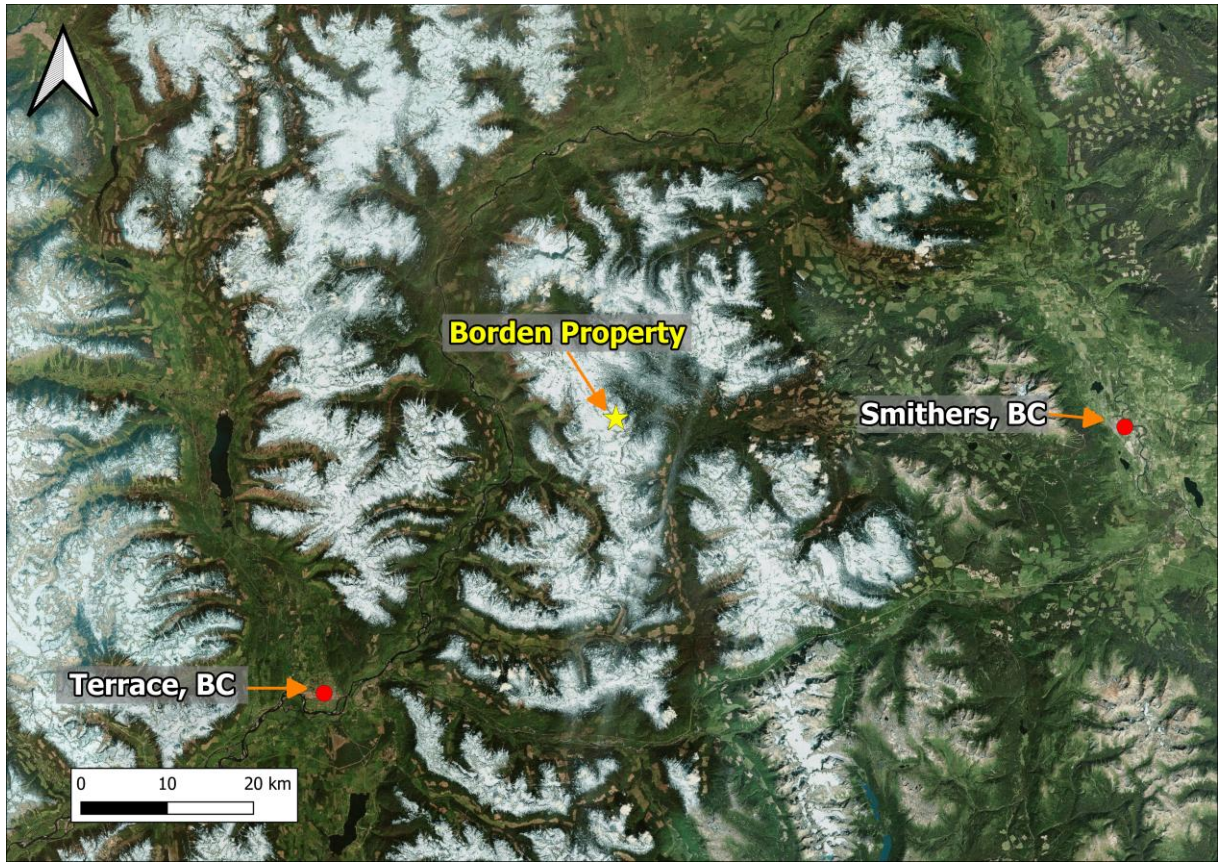

Qualified Person – Technical information contained in this presentation has been reviewed and approved by Ian Dickie, P.Geo., a "Qualified Person" as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects.

Overview

- 45km from Terrace, BC
- High value claim block
  - Stikine Terrane
  - Adjacent to J2 Syndicate's Empire Property and Star Copper's newly acquired Zymo Project
- Possible northern extension of the Inca Trend, which has returned values of up to:
  - 16.4g/t Au,
  - 36,875g/t Ag,
  - 27.6% Cu,
  - 33.9% Pb and,
  - 29.98% Zn

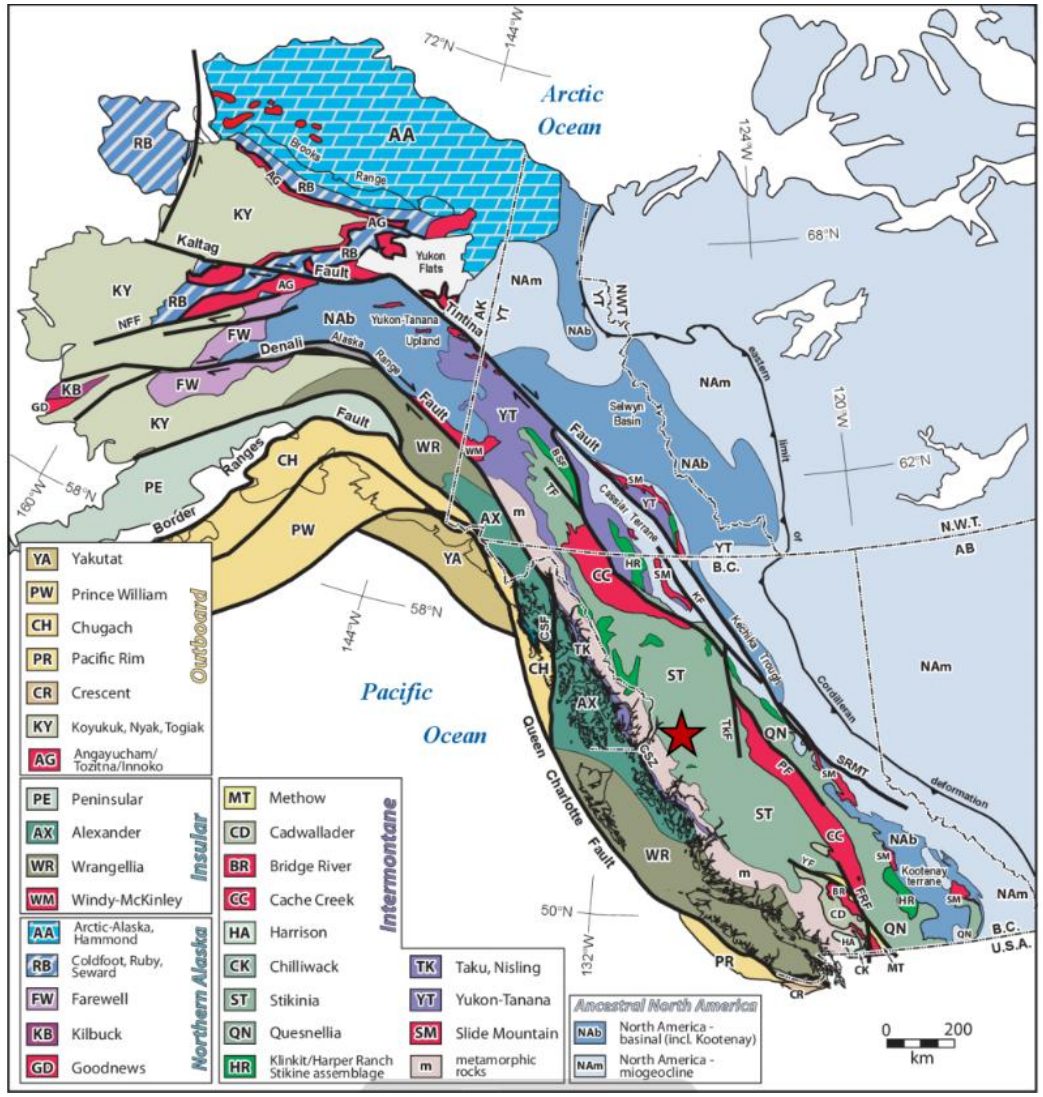

Location and Access

- 372ha
- Grassroots-stage exploration target
- 100% Owned
- 45km NE of Terrace, BC
  - Helicopter access
- Several mineralization targets
  - Porphyry
  - VMS
  - Epithermal
  - Polymetallic Veins

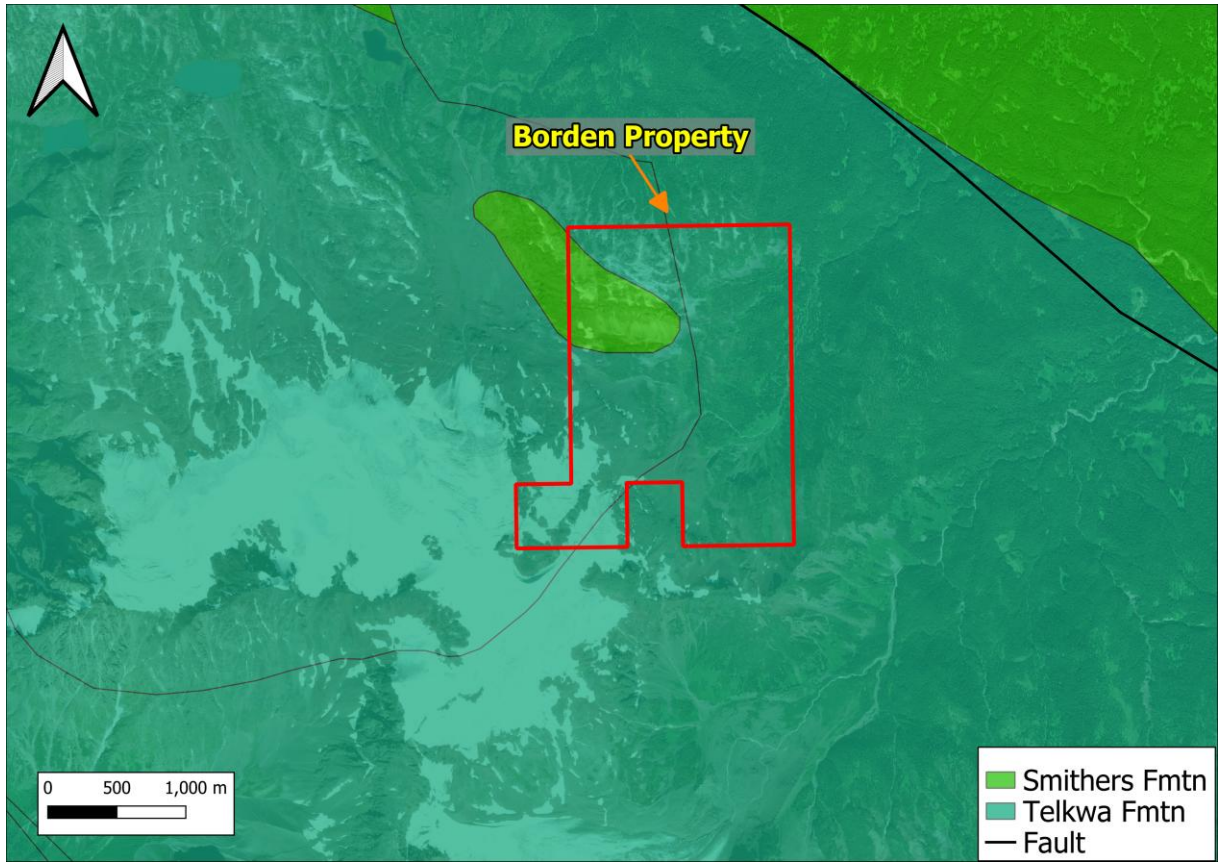

Regional Geology

- Stikine Terrane, just south of BC's Golden Triangle
  - A long lived, NW-trending, multi-episodic, Paleozoic to Mesozoic arc terrane
  - Renowned for hosting significant porphyry, epithermal, and VMS deposits (e.g., Red Chris, Brucejack, KSM)
- The Stikine Terrane is situated between the Cache Creek terrane to the east and the Yukon-Tanana terrane to the north and west
- Subduction related convergence of the Insular terranes generated magmatism which contributed to the Coast Plutonic Complex,
- The Borden Project area is located near the contact between the Stikine Terrane with the Coast Plutonic complex

Property Geology

- Underlain by the Lower Jurassic Telkwa Formation and Middle Jurassic Smithers Formation of the Hazelton Group
  - Represents the final stage of magmatic arc activity in the Stikine terrane
  - **Hosts several, porphyry, VMS, and Epithermal deposits in the Kitsault River Area**

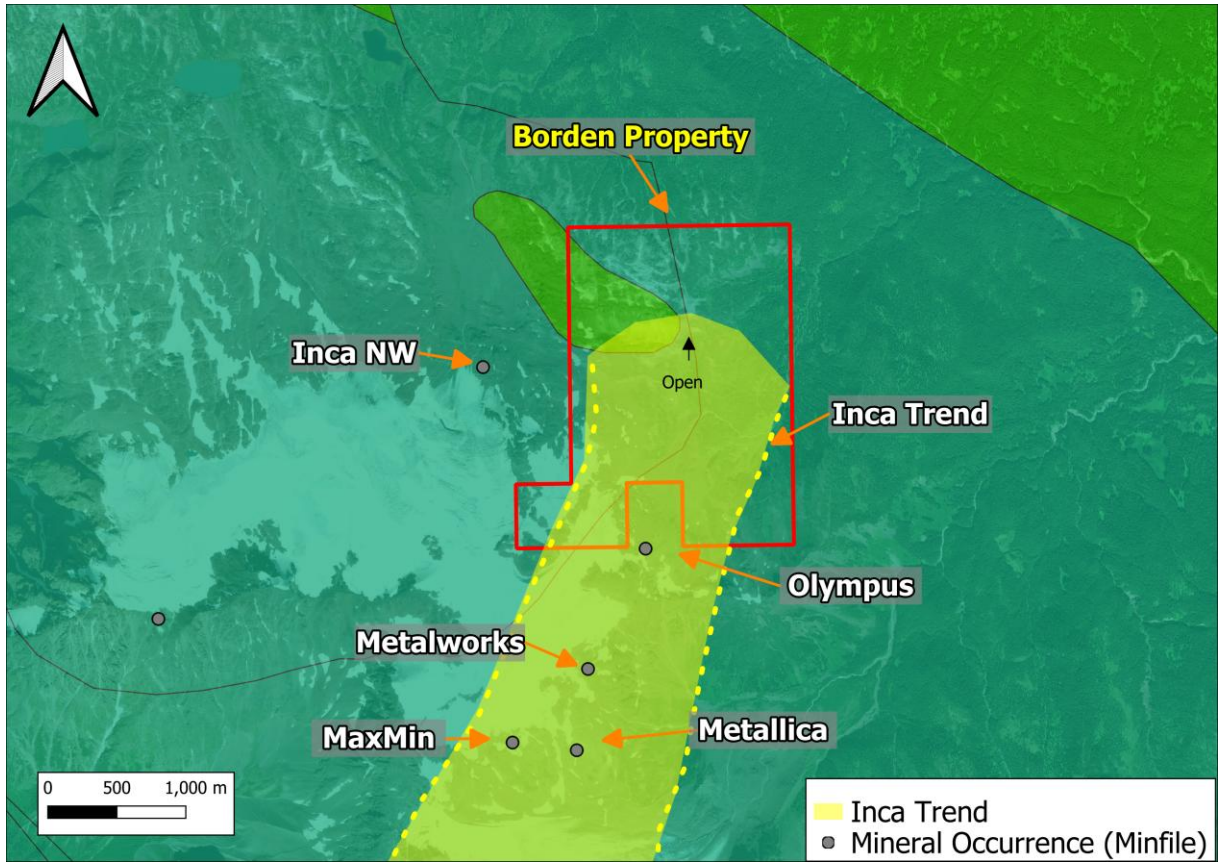

Property Mineralization

- Base metal mineralization is common in the region and can occur in association with quartz veining, shear zones, replacement zones, or as disseminations

The Borden Claim may represent an extension of J2 Syndicate's 'Inca Trend' which has been tentatively interpreted as a transitional-intermediate sulphidation deposit

- **Inca Trend - Olympus, Metalworks, Metallica, Maxim:** Assays of up to 16.4g/t Au, 36,875g/t Ag, 27.6% Cu, 33.9% Pb, and 29.98% Zn
- **Inca NW:** Grab samples of up to 25.2g/t Au, 3.6% Cu

Proposed Exploration Program

Phase 1 Exploration Program

▪ Detailed Prospecting and Mapping
  ▪ Investigate the possible northern extension of J2's 'Inca Trend'
  ▪ Soil sampling to uncover the potentially buried northern extension
  ▪ Focus on the lesser explored northern portion of the property

▪ Airborne Geophysics   ▪ Airborne magnetic and gravity surveys should be considered to provide more information about subsurface structures and trends which could support or control mineralization

Project Highlights

- Easily serviced out of Terrace or Smithers, BC
- High value claim block adjacent to actively exploring companies
    - J2 Syndicate – Empire
    - Star Copper - Zymo
- Possible extension of J2's polymetallic, bonanza-grade Inca Trend
- Little detailed work
    - Clear exploration pipeline, significant upside
- Several deposit models due to prospective Hazleton Formation – Porphyry, VMS, Epithermal, Polymetallic Veins.

About Cronin Exploration

Natural Resources focused investor and advisor

We seek opportunities to **Partner** with management teams in the **Formation** and **Development** of companies

Principal investors, **Proprietary** deal flow, **Global** reach

From **Seed** though **Harvest,** growing the companies of tomorrow through **Diligent Advice** and **Patient Capital**
